

ENERGY & UTILITIES

SECURING THE GRID: RELIABLE PERIMETER PROTECTION FOR ENERGY INFRASTRUCTURE

BASTEEL Perimeter Systems provide secure, durable fencing and gate solutions for energy infrastructures, offering critical protection against unauthorized access, vandalism, and environmental exposure. Engineered for long-term performance and regulatory compliance, BASTEEL systems help ensure the safety and reliability of essential electrical frameworks.

Security and Deterrent Capabilities

Deter threats and unauthorized access with robust perimeter systems.

Durable, Low Maintenance Materials

Engineered for long-term performance and minimal upkeep.

Custom Designed and Fabricated

Made to order systems that are tailored to meet site-specific requirements.

High Performance Finishes

Finished in super durable polyester or Kynar powder coating to withstand the test of time.

PRODUCT RECOMMENDATIONS

Substation Enclosures

BASTEEL enclosures provide utility-grade protection, securing spaces against intrusion, vandalism, and environmental hazards while maintaining the highest standards of safety, reliability, and compliance.

Cantilever Gates

BASTEEL Cantilever Gates use a durable mono-bloc carriage with sealed rollers and a galvanized track for smooth operation, compatible with all gate operators and access systems.

Personnel Gates

Engineered for easy installation and long-term durability, each pre-hung gate comes with installed hardware for quick, precise setup in new or existing foundations.
